REASONS FOR ALLOWANCE

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Hidaka et al (US 5,420,745).

The following is an examiner's statement of reasons for allowance: allowance of claims 1, 3-10, 21-22, and 24-28 is indicated because the prior art of record does not show or fairly suggest a surface-mountable PTC thermistor element having a lower terminal which includes a vertical-leg portion connected to and bent vertically in a downward direction from the terminal junction portion, wherein the vertical-leg portion extends perpendicular to the surface of the thermistor element body and the terminal junction portion and is located closer to the center of the thermistor element body than to the periphery of the thermistor element body. It is noted while the reference to JP 10-214704 shows a lower terminal including a vertical-leg portion of a similar configuration with the instant application. However, the vertical-leg portion of the JP 10-214704 is not located closer to the center of the thermistor body but to its periphery. Furthermore, while Hidaka et al shows a surface-mount type ceramic capacitor having a lower terminal which includes a vertical-leg portion located closer to the center of the capacitance body than its periphery. The capacitance body is clearly not a PTC element and its function is clear for resonance circuits, AC noise suppression or rectifier circuits but not for temperature detection or sensors like PTC thermistor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

REMARK

The information disclosure statement (IDS) submitted on June 17, 2004 has been fully considered by the Examiner. For the record, a copy of the PTO -1449 including the Examiner initial is also attached.
